PROFESSIONAL SUMMARY

Senior Frontend Developer with 7+ years of experience building enterprise-scale web applications using React, JavaScript/TypeScript, and modern frontend architectures. Expertise in UI-heavy systems, monorepo and micro-frontend architectures across healthcare and BFS domains, with hands-on experience implementing in-house analytics layers for feature usage reporting and owning CI/CD pipeline deployments via GitHub Actions. Leverages AI-assisted development tools (Claude Code, GitHub Copilot) — including structured code review and pre-implementation planning workflows — to enhance development productivity, code quality, and delivery efficiency.

SKILLS

Frameworks and Technologies: React JS, Redux, Zustand, Tailwind

Languages: TypeScript, JavaScript (ES6+), SCSS, CSS, HTML

Testing: Vitest, Jest, React Testing Library

AI Development Tools: Claude Code, GitHub Copilot Agents (VS Code)

DevOps & CI/CD: GitHub Actions, Build/Release Automation, JFrog Artifactory

Developer Tools: Git, Webpack, Vite, Nx Monorepo, pnpm, Postman, Chrome DevTools, Lighthouse, React and Redux dev tools, Axe, Biome, Omnibug

WORK EXPERIENCE

Infosys

Senior Frontend Developer – Consultant, Healthcare

Bangalore, India

Aug 2025 – Present

Pharmacy Drug Management System:

- Serving as offshore frontend team lead for a large-scale enterprise pharmacy platform supporting drug dispensing, inventory management, and prescription workflows, coordinating an Agile/Scrum team of 4-5 engineers.
- Built drug search and compound medication management features with type-ahead suggestions and advanced search capabilities using **React 19**, **TypeScript**, **Zustand**, and custom React hooks within an **Nx monorepo** architecture.
- Published Drug Search Provider package to **JFrog Artifactory**, enabling cross-team reuse and reducing code duplication.
- Improved application reliability and performance through **Vite + Nx** optimizations, and unit/integration testing with improved test coverage to **90% using Vitest and RTL**.
- Own end-to-end **CI/CD pipeline deployment** for the team using **GitHub Actions**, managing build, test, and release workflows to ensure reliable and repeatable deployments.
- Integrated an **in-house analytics layer** into the UI application to capture and report on feature-level usage, giving product and engineering stakeholders visibility into adoption trends and informing prioritization decisions.
- Drive AI-assisted development practices using **Claude Code** for the majority of implementation work, applying a structured review-and-plan-before-edit workflow to maintain code quality and reduce rework across the team.

Cognizant

Frontend Developer – Associate, BFS

Hyderabad, India

Jan 2022 – Aug 2025

Notification Center:

- Developed the Notification Center UI using **React JS**, **Context API**, and **SASS** as part of a micro frontend architecture.
- Developed a single interface that aggregates product-level notifications with filtering and bulk edit capabilities, including features like delete and mark as read.
- Integrated **GraphQL APIs** for efficient data fetching and mutation, optimizing the interaction between the frontend and backend services. Integrated **AEM content** to enable multilingual support, improving user accessibility across regions.
- Integrated analytics services to gain insights into customer data and enhance decision-making capabilities.

- Wrote unit test cases using Jest and React Testing Library, ensuring robust and maintainable code.

Alert Widget:

- Built a dynamic, modular Alert Widget using **React JS and Webpack Module Federation**, enabling easy integration with other applications.
- Leveraged prop-driven design from the consuming application to conditionally render UI elements and modify the behaviour of call-to-action buttons based on product-specific requirements.

Alert Management Dashboard:

- Created a feature-rich Alert Management Dashboard using **React JS, Context API, and Webpack**, enabling users to manage alert preferences (e.g., email, SMS, push notifications).
- Utilized **React Router** for seamless navigation between different product alert management pages, enhancing the user experience.

Tata Consultancy Services

Frontend Developer - System Engineer, TCS Interactive

Hyderabad, India

Sep 2019 - Jan 2022

Learning Module Trends:

- Developed the UI for Learning module trends using React JS, JavaScript, CSS.
- Integrated trend data from API endpoints and displayed data using Chart.js
- Consumed data in various components with Context API.

EDUCATION

JNTUH College of Engineering Sultanpur

Bachelor of Technology in Electronics and Communications Engineering

Sanga Reddy, Telangana, India

Aug 2015 – May 2019
